Nota

El que aparece aquí como Postludio fue originalmente una pieza que compuse a quien ahora es mi esposa, aún antes de que fuera mi novia. De allí su carácter triste y melancólico, y su título, explícito cuan explícito puede serlo.

Los 6 preludios fueron compuestos casi por completo en mayo-junio del 2007.

El preludio 1 se compuso parcialmente en marzo, quedando terminado a principios de mayo. El preludio 2 fue concebido inicialmente como un estudio para las manos superpuestas, dedicado a Alejandro [Novmacl]. Comencé a trabajar en el en julio del 2006, quedando estancado más o menos en sus 2/3 partes, y fue hasta mayo de este año que quedó terminado, con un aire que resultaba idóneo para insertarlo con los preludios restantes.

Quizá pocas cosas especiales hay en el resto de los preludios, apuntaré que el no. 5 nació como un estudio de aproximación a un ritmo que me atrajo muchísimo tiempo, y que me parece hasta cierto punto autóctono o por lo menos de raíces indígenas. Los temas en quintas y demás son precisamente el intento de que la sonoridad matice la fuerte impresión o huella del ritmo principal.

El Huapango Brillante, como lo indica su nombre, es una aproximación a lo que es este tipo de música. Quizá lo más difícil de todo fue sobreponerse a la impronta de la composición de Pablo Moncayo para orquesta. Si se recuerda que ese mismo Huapango está basado en temas populares y plenamente conocidos en México, se constatará que, parafraseando a Borges: 'Un huapango es todos los huapangos'.

La idea inicial nace propiamente como una transcripción del ritmo de los conjuntos 'huapangueros' típicos al marco y posibilidades del piano. Hasta qué punto lo logré es algo que de momento no alcanzo a percibir, aunque ya había abordado previamente el ritmo y sus posibilidades, tal como aparece en los compases finales de la pieza 'Predestinazione', dedicada a mi padre [27 noviembre 2004].

Aunque propiamente pensadas para ser ejecutadas, Alejandro me ha hecho notar que algunos intervalos dificultan tremendamente cualquier intento de tocar algunas composiciones, por ejemplo, intervalos de novenas, décimas y superiores. Si bien el programa informático puede sin ningún problema ejecutar simultáneamente esos sonidos en tales intervalos, es físicamente imposible para un pianista alcanzarlos tal cual están en el papel. Queda pues, al arbitrio del ejecutante hacer las modificaciones pertinentes para llevar a cabo su ejecución: arpeggios extendidos y/o apoyaduras son por lo menos 2 soluciones que encuentro a tales dificultades, plasmadas en el papel por las necesidades mismas del desarrollo intrínseco de todas y cada una de las piezas.
